VERSAFILLER™ WATER FOUNTAIN & BOTTLE FILLERS

Enjoy the best of both water options; refreshing fountain water and a bottle filler unit for refillable bottles. The VersaFiller™ accomplishes both tasks with ease and simplicity, and puts your location at the top of the refillable bottle trend while making a bold statement about your concern for the environment.

The VersaFiller™ is also designed for the future. The alcove and activation button contain Freshield™, which utilizes a silver-based antimicrobial compound. This is ideal for work-place settings, schools, university locations, and any public building.

The VersaFiller™ unit is available in two configurations. The **ON557** (PWSBF) model can be retrofitted to existing **OA059** (P8AC) coolers as well as ElKay's EZ8 models (some installation is required to connect this unit to existing P8AC models) providing an instant upgrade to those products already in the field.

The **ON557** (PWSBF) is also designed for simplicity of installation, requiring only water tubing connection to the host (P8), with no required electrical connections or separate drains.

The VersaFiller™ can be purchased as a complete top and bottom combination as well, **ON555** or **ON556**.

STANDARD FEATURES:

- Waterways are lead-free in materials and construction
- Heavy-duty galvanized steel frame bolts directly to the wall
